Subject: 47.5 - 57 Kimball Road

Dear Atty. Parry,

I am writing on behalf of the Planning Board to inquire about the status of the proposed cluster subdivision application for this parcel. The Board had received a request on behalf of the applicant in January requesting a continuation of the public hearing for 60 days. This continuation was requested to allow for preparing responses to the initial peer review report issued in Oct 2015. To date, the Board has not received any responses to that report.

At its meeting on March 14, 2016, the Board requested the applicant provide an update to the status of responses to that peer review report and expected timeframe in which it can expect to receive them. The Board would like to move the public hearing process along and not have it stall for such extended periods of time. If additional time is still needed, please complete the public hearing continuation sheet for a new request for further continuation.

I had called your office twice last week to discuss this matter with you and left a message with your office today as well. I am following up with this email. Hopefully, you can provide an update via email or call me at your earliest convenience.

Sincerely,

Nipun Jain
